

Boy Scout Troop 153 and the LaGrange Rotary Club present Flags Over Oldham

The Rotary Club and the Boy Scouts invite you to join your neighbors and friends in displaying the American Flag on six special days throughout the year. These days are **Memorial Day, Flag Day, Independence Day, Labor Day/Patriot's Day (9/11), Veteran's Day and President's Day (weather permitting)**. This gives you the opportunity to display your patriotic spirit, pride and love for our country while providing funds for the Boy Scouts to provide much needed services to our community.

The Flag Lease Program is a service project of the LaGrange Rotary Club and Boy Scout Troop 153. Rotarians are dedicated businessmen and women who provide humanitarian services to people throughout the world. Boy Scouts are dedicated to their threefold purpose of character development, citizenship training and physical fitness.

When you order a flag, we will insert a PVC plastic sleeve with a cap in the ground at a spot you designate. No brackets or fixtures are attached to your home. On each of the six days, a 3' x 5' U.S. Flag mounted on a 10-foot metal pole will be placed in the sleeve. We own, display, store and maintain the flags. It is all done for you! Unless it is lit, please bring the flag inside each night and put it out again in the morning. Please display the flag on the day of pickup, rain or shine. Boy Scouts will pick up the flag.

The cost of the annual Flag Lease Program is \$30 for all six events!

Call _____
or e-mail flags@troop153bsa.org.

<u>Holiday</u>	<u>Delivery</u>	<u>Pickup</u>
Memorial Day '12	May 25,26	May 29
Flag Day '12	June 13	June 15

President's Day '13	Feb 15,16	Feb 19

Please return this portion with payment to Boy Scout Troop 153 Flag Lease Program

Yes, we want to lease a flag from the Boy Scouts. It is our responsibility to advise the Scouts on the placement of the PVC plastic sleeve to avoid sprinklers, plumbing, electric service and other underground hazards. It is also our responsibility to ensure that the plastic sleeve does not rise above the surface of the ground where it could become a hazard to lawn equipment.
